

Escape 5.0

ABOUT THE ESCAPE 5.0

The Escape 5.0 is our tandem axle fifth-wheel trailer. All Escape travel trailers are manufactured with a 100% molded fiberglass body creating a true lightweight trailer, with dry weights starting at 3910 lbs. for the E5.0. The E5.0 comes standard with a large two-person bed in the front, full wet bath, and a dinette that converts to a two-person bed in the rear.

The frame of the E5.0 is constructed with box steel and a rubber ride torsion axle suspension creating a solid foundation for a smooth ride. The interior is professionally crafted with your choice of standard Maple, Contemporary, or one of 9 available upgrade cabinetry finishes. Paired with large windows, high-quality vinyl flooring, and a distinctive insulated vinyl headliner and wall covering, every

detail is designed for comfort and longevity.

Every Escape trailer includes a long list of standard features and an extensive options list available for even more personalization. Every trailer also comes with a limited two-year warranty. The body of the trailer is constructed from top and bottom of fiberglass shells which are bonded together with glass reinforced fiber to create a true one-piece unit.

The roof has a raised dome allowing water to run off rather than pooling. This greatly reduces any chance of water penetration while maintaining a strong, long-lasting lightweight trailer.

The Escape's aerodynamic and lightweight design eliminates the need to invest in a large towing vehicle in contrast to a conventional RV trailer. The Escape 5.0 is a tandem axle fifth-wheel trailer designed to be towed by a standard half-ton pickup truck.

Our customers are pleased that Escape trailers offer abundant

interior storage space, especially in the large overhead cabinets.

Light-coloured hygienic wall coverings and large windows throughout each unit creates the feel of a more roomy, bright space.

Escape trailers utilize real wood for cabinet doors and plywood for tables, countertops, and the floor.

E5.0 BASE FEATURES
