

INTRODUCING ARKA

Turn nowhere into somewhere.

The all-new Winnebago ARKA is built for those who don't stop where the road ends. With true off-road capability, all-season performance, and the comfort to recover and go again, it's your basecamp for deeper, longer, more independent adventure.

Built for the Backcountry

- **Purpose-built for off-road performance**, with optimized approach, breakover, and departure angles; a four-point articulating box-to-chassis mount; and a clean underbody.
- **Durable exterior construction** with a full-body coating, integrated branch guards, and a molded, one-piece fiberglass roof designed to shed water.
- **Built to carry and tow serious gear**, with a 15,000 lb towing capacity, 1,500 lb tongue weight, and a rear gear garage with an integrated L-track system.

Comfort + Versatility

- **True all-season performance from -10°F to 120°F**, with hydronic heating, heated floors, and high-efficiency insulation that performs when conditions don't cooperate.
- **A quiet, controlled interior lounge** includes a full galley, aluminum cabinets with select lockable compression latches, soft overhead bag storage compartments, and easy-to-clean surfaces.
- **Modular living spaces** include a versatile dinette that flexes from storage to work to sleep modes, a hidden shower and cassette toilet, and a cabover bunk that converts from twin beds to a queen to a king-sized WinnSleep® bed.

Go Further. Stay Longer. Stay Connected.

- **Extended off-grid capability for up to 14 days**, with ample tank capacity, 800W of solar power, and up to 15 kWh of lithium battery capacity with dedicated alternator charging.
- **Winnebago Connect™** smart control system gives you mobile visibility and command of your power, climate, tanks, locks and pet security—on or off the grid.

RUGGED WHERE IT COUNTS. REFINED WHERE IT MATTERS.

Not overbuilt for show. Not underbuilt for backcountry realities. The ARKA strikes the ideal balance, delivering real capability and real comfort wherever you go.

- 36-month/36,000-mile limited warranty on structure
- 36-month/36,000-mile limited warranty on structure
- RAM 5500 CHASSIS WARRANTY
- 36-month/36,000-mile basic warranty
- 60-month/100,000-mile diesel powertrain warranty

FOOTNOTES

1. The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of your vehicle may vary by several inches depending on chassis or equipment variations. Contact your dealer for further information.
2. The load capacity of your motorhome is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motorhome.
3. Capacities are based on measurements prior to tank installation. Slight capacity variations can result upon installation.
4. Capacities shown are the tank manufacturer's listed water capacity (W.C.). Actual filled propane capacity is 80% of listing due to overfilling prevention device on tank.
5. Actual towing capacity is dependent on your particular loading and towing circumstances which includes the GVWR, GAWR, and GCWR as well as adequate trailer brakes. Refer to the chassis operator's manual of your motor home for further towing information.
6. Sleeping capacity is the maximum based on a specific floorplan.
7. See separate chassis warranty.

*See your dealer for complete warranty information

Because features, specifications, equipment, and options may vary from those highlighted in this brochure, the buyer is responsible for confirming with the dealer the features, specifications, equipment, and options included on their specific vehicle. In addition, Winnebago's program of continuous product improvement may result in changes to vehicle specifications, equipment, model availability, and price without notice.

Winnebago recommends following the winter use guidelines and winterization procedures outlined in your owner's manual whenever camping in freezing conditions.
